SEAT-TO-SPEC*

Please Supply Client Information:

Client Height: _____

Client Weight: _____

Seat to Floor Height (Check one below)

Seating System	Seat to Floor Heights*	
Pan Seating	17 1/2" min	20" max

☐ 17 1/2"

☐ 19"

☐ 18"

☐ 19 1/2"

☐ 18 1/2"

☐ 20"

Seat to floor height is adjustable from 17 1/2" to 20" in 1/2" increments.

* While every effort will be taken to ensure STFH dimensions will be preset to your specifications prior to shipping, variations in options may affect final settings.

STFH is measured from top of seat pan to floor.

Note: This does not account for seat cushion height.

REHAB SEAT SPEC

Rehab Back w/ Solid Seat Pan and Adjustable Width & Length

Rehab solid seats have a set by hardware recline, with a range of approximately 95° to 120° as illustrated below. Adjustment of the recline angle requires tools to reset.

The Rehab System does not include the individual seating and positioning components. Shoprider chose to work with Therafin to insure that their components interfaced properly with the Shoprider Rehab Seat Frame on our XLR-RS version of the XLR Series of Group 2 Complex Rehab Systems. However, You are free to choose the manufacturer of your choice for your seating components.

Our Rehab seat is equipped with 7/8" OD Seat Back Cane tubing.

The back-mounted spreader bar extends 4" in depth.

The square tubing seat rail has mounting holes positioned 2" apart.
